## **1.0 PRODUCT DESCRIPTION**

HDS26 series is a set of broadband optical transmitter and receiver. Its frequency bandwidth covers 47~862MHz and 950~2200MHz and it is applicable for CATV and SAT-IF transmission.

HDS26 adopts 1U 19"standard chassis. The operating parameter is controlled by MPU, and the front panel LCD provides the select display and error diagnosis. It has standard RS232 communication interface and SNMP network management function.

HDS26 series optical transmitter adopts world famous cooling DFB laser that is featured with high linearity, with optical isolation and internal modulation mode. The whole unit is installed perfect laser APC, ATC control circuit to ensure the laser's long life span and high reliable working.

The SAT-IF adopts high linearity IF drive circuit with AGC function and the CATV adopts pre-distortion compensation RF AGC drive circuit, which improves the system CSO index and ensures the high quality of SAT-IF and CATV-RF signal transmission in one fiber.

The production and application of HDS26 series broadband optical transmitter and receiver offers an economical solution for CATV operators to add SAT live broadcast business to current network.

HDS26TX: CATV & SAT-If broadband optical transmitter (1RU chassis ).

HDS26-108-00RX: CATV & SAT-IF broadband optical receiver (1RU chassis).

HDS26-308-00RX: CATV & SAT-IF broadband optical receiver (Wall-mounted type).
