

WISI LR 94 2x01

RF Overlay Receiver for FTTH applications

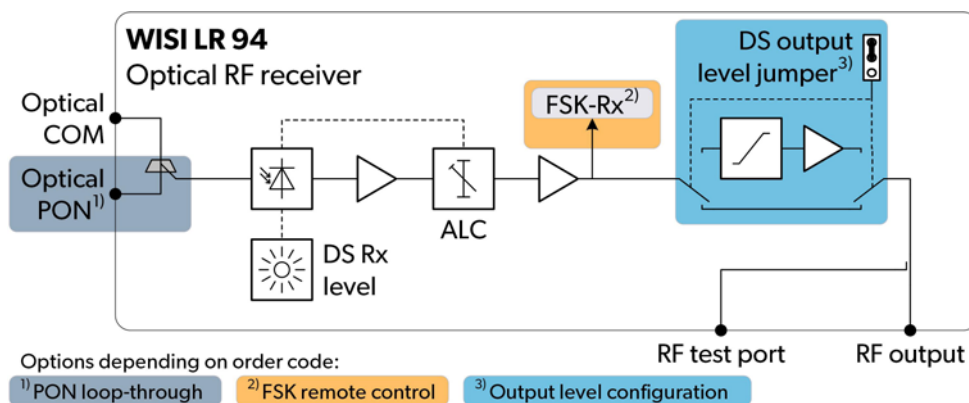

Description

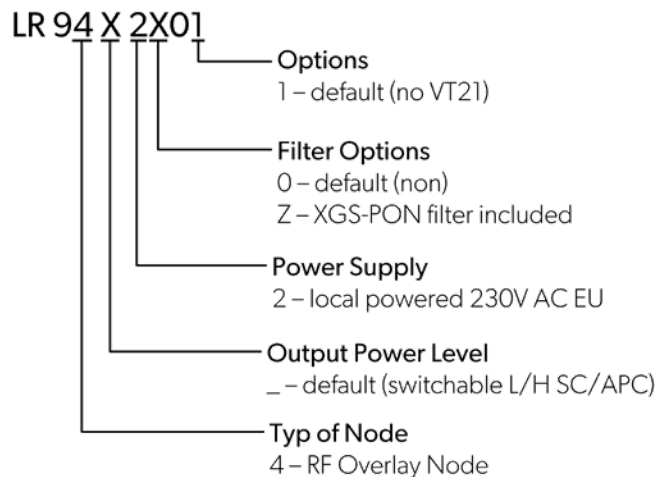

The LR 94 2x01 is an RF Overlay receiver with a high output level that supports SDU and MDU in-house distribution architectures. The wide downstream level range covers the input side while the built-in AGC keeps the RF level constant. Its compact design requires a minimum amount of space.

At a glance:

- Downstream up to 1.2 GHz
- Compact housing for indoor deployment (IP20)
- Optical ALC for regulated output levels
- Switchable output power High / Low
- RF test port for the output signal
